Books Read this year App

The client is looking for an app to track the books read throughout the year. It could also suggest a book, and show

MVP

A user should be able to:

- Search books from an API, find a specific one and add it to your database
- View, edit and delete it.
- Mark the book as read, or still to read.

Example Extensions

- Suggest a book - randomly generated from the app
- Using a graph to see your progress over the year. A visual of your books per year.

Advanced Extension

- Share a book externally - send a book to another user in the app
- Share a book externally - send a book by email

API, Libraries, Resources

- https://www.highcharts.com/ HighCharts is an open-source library for rendering responsive charts.
- https://openlibrary.org/developers/api Open Library is an online project intended to create "one web page for every book ever published".
